GVF Training Newsletter

www.satprof.com

Welcome to this edition of the *Global VSAT Forum* Training Newsletter! The GVF is the association of the satellite communications industry. *GVF* offers a global VSAT Installer Certification program and maintains an on-line database of Certified Installers. This service is enabled through curriculum development and administrative support provided by *SatProf, Inc.* The training program features interactive, animated on-line fundamentals courses and hands-on classroom sessions. For class schedules, tuition fees, and on-line registration, please visit the *GVF Training Portal*.

Featured training center: Mahdi Bagh Computers (India)

This edition of the training newsletter is the first of a series featuring GVF examiners and training centers around the world.

With GVF-qualified Examiners on staff, Mahdi Bagh Computers (MBC) offers regular GVF Hands On Skills Test (HOST) sessions at its headquarters in Maharashtra (Pune) India, and at sites across India and Asia by arrangement.

MBC is GVF's regional partner for training, testing and certification. "MBC has been a testing site for GVF since 2009," said Riaz Lamak, president and director of MBC. "We are committed to the GVF training program and eager to help trainees complete their certifications and advance their skills through further training." MBC offers a scheduled HOST each month and on demand with 24 hour notice in Pune and, for groups of 10 or more, will conduct a HOST at a customer site.

In addition to the Basic HOST, MBC offers coaching in the GVF online

Spread the news about GVF training:

For more information:

- Learn about certifications, view course outlines, check the on-site class schedule, and register for courses instantly at the *GVF Training Portal*.
- You are welcome to take the interactive, animated *guided tour*.
- Visit the main *GVF web site*.
- *Contact us* with any questions.

Follow us on:

courses and supplementary satcom and telecom training in regional languages with the help of interpreters. Since its founding, MBC has trained more than 1,500 VSAT users across India through teleconference and onsite training programs at over 90 locations.

"In

addition to being a key regional training partner for many years, Mahdi Bagh Computers has been a trail blazer in the latest area of GVF services offered—the Network Validation program," said GVF Secretary General David Hartshorn.

Mahdi Bagh Computers also provides earth station installation support and other services. Details about MBC training can be found at: <http://www.mbcin.com>. To arrange for a HOST or other training, contact MBC directly at riaz.lamak@gmail.com.
